

UPRIGHT PIANOS

YAMAHA

A Yamaha piano isn't merely constructed, it's brought to life.

Founded in 1887, Yamaha has become a world leader in high-quality, inspirational musical instruments. We crafted our first piano in 1900. Since then, our uprights and grands have captivated players and audiences alike, combining exquisite natural response with truly wonderful sound.

Yamaha's longevity owes much to our constant refinement of technologies used to build high-quality pianos. But there's more to it than that. We also nurture a culture in which expert know-how is passed down from

one generation to the next. No machine can replicate all the processes of building a piano. From wood selection and woodworking to regulation and voicing, every step has evolved over time in the pursuit of perfection. You can see it—and hear it—in every piano we make.

Our progress is driven by the twin engines of constant innovation and cherished tradition. Today, Yamaha is more committed than ever to the design and production of beautiful pianos with rich acoustic tone, unmistakable feel, and timeless beauty.

YUS series

Crafted from premium materials with an elegant and striking design, the YUS Series brings high-end refinements and performance to the upright piano. The YUS Series features a unique cabinet design that offers superb acoustics, with resonance and projection far more like a grand piano than a traditional upright. The sound is further enhanced by the use of premium grand piano hammers that are finely adjusted by our master craftsmen to ensure optimal tone, volume, and tonal balance across the full range of the instrument. These three models are available in a variety of beautiful finishes.

U series

The U Series is considered an educational and institutional benchmark worldwide. A U Series piano makes for an excellent student instrument, whether in the home or in an educational institution. These pianos feature an expansive soundboard that creates a rich, resonant voice with an evenly balanced timbre across the full range of the keyboard. Specially designed hammers for each model ensure exceptional tone production and long-term durability, making them ideal for extensive use.

Two model variations are available in a variety of finishes.

b series

Designed to offer Yamaha quality at the most affordable level, b Series pianos draw on everything we have learned from over 100 years of piano production. The result is a dependable instrument that's ideal for the beginning pianist. With a compact, robust design and no compromises on materials or craftsmanship, the b Series offers Yamaha's renowned pure, clear tone and an easy-to-play, responsive keyboard that inspires players of all levels. The b Series is also available as a SILENT Piano™, enabling practice with headphones.

Expanding the Possibilities of the Piano

At Yamaha, our unique approach combines time-honoured traditional craftsmanship with the very latest technological innovations. We create pianos that inspire and truly enhance the playing experience, whether you're learning, practising, performing, or playing for pleasure.

Thanks to superior construction and empowering innovation, Yamaha pianos are popular in schools, concert halls, studios, music academies, and of course homes, where they provide the perfect centrepiece to your musical life.

disklavier **ENSPIRE**

The World's Most Advanced Piano

A piano with unlimited potential and the pinnacle of performance reproduction technologies, the Disklavier ENSPIRE is the perfect experiential platform for any environment.

At the heart of every Disklavier is a beautifully crafted Yamaha acoustic piano. Whether you're playing or enjoying the playback of a recorded piece, you can

delight in the presence and resonance of a superb-sounding acoustic piano. The Disklavier ENSPIRE truly captures and illustrates the beauty of performance. With just one tap, the keys and pedals of the Disklavier come to life with effortless motion, recreating a precise portrayal of the artist's intentions.

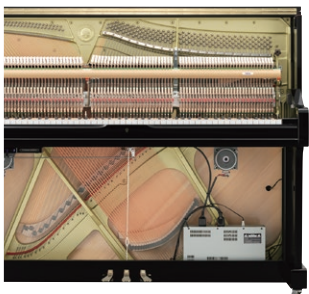

TransAcoustic™

Digital Was Never More Natural

The TransAcoustic Piano introduces a new way for you to musically connect with your instrument, enhancing the playing experience by using all elements of the acoustic piano to augment and amplify digitally generated sounds. The TransAcoustic piano will envelop you in a way that even the most sophisticated speaker systems cannot. Expand the

sonic footprint of your acoustic piano to meticulously recreate the sound of a 9-foot Yamaha CFX Concert Grand, transform it into an electric piano, or add orchestral strings to the acoustic piano. Lower the instrument's volume for a more intimate setting or engage the SILENT mechanism to play without disturbing anyone.

SILENT *Piano*™

Authentic Sound at Any Volume

To those who love the sound and feel of an authentic acoustic piano but who need the flexibility to play whenever inspiration strikes, we offer the SILENT Piano.

Simply connect headphones (or speakers) to enjoy the true feeling of an acoustic piano but with absolute control over ambient sound levels. The hammers will no longer hit the strings, and instead a high-quality grand piano

sound is produced digitally, allowing you to play in complete privacy in any environment. When the piano is in SILENT mode, you can also select additional instrument voices to accompany your music.

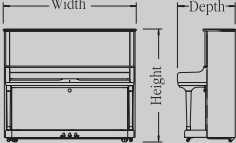

Early mornings, late nights – no problem. Now you can play wherever and whenever you like.

The smart device app “Smart Pianist” (available as a free download) enables you to use the functions such as selecting Voices, controlling the metronome intuitively with the visualized interface, or display the score on your smart device.

The UD-WL01 USB Wireless LAN Adaptor (sold separately) is required to use Smart Pianist over a wireless connection.
